Training

Mastering Data Structures and Algorithms, LPU | **June 2025 - Jul 2025**

- Completed a structured skill development program focused on Advanced Data Structures using C++.
- Applied core data structure concepts through hands-on coding practice and real-world problem solving.
- Gained strong proficiency in Arrays, Linked Lists, Stacks, Queues, Trees, and Graphs.
- Implemented Sorting and Searching algorithms with attention to time and space complexity.
- Improved algorithmic thinking, code optimization, and logical reasoning for technical interviews and coding assessments.

Projects

Student Academic & Digital Behavior Analysis | *Power BI, Dax, Data Modeling* **November 2025 - December 2025**

- Analyzed large-scale student feedback data to examine the relationship between academic performance and digital engagement, focusing on online learning behavior and screen-time patterns.
- Designed and developed interactive dashboards to highlight online learning tool usage, social media engagement, and academic trends across departments, years of study, and demographics.
- Applied data analysis and visualization techniques to transform raw survey data into actionable insights that support data-driven understanding of modern student learning behavior.
- Repository Link: *GitHub-link*

Financial Risk & Bankruptcy Prediction Model | *Python, Scikit-learn, Pandas , VS Code* **October 2025 - November 2025**

- Analyzed 90+ financial features to build a binary bankruptcy prediction model from real-world financial ratio data.
- Applied classification and clustering techniques to identify 2 distinct financial risk groups among companies.
- Achieved high predictive accuracy (≈ 90%+) and evaluated the model using accuracy score, confusion matrix, feature importance, and PCA-based visualizations.
- Repository Link: *GitHub-link*

E-commerce Customer Behavior Analysis | *Python, NumPy, Pandas, Matplotlib, Seaborn* **January 2025 – February 2025**

- Developed a Python driven-data analysis pipeline to process and analyze 10,000+ e-commerce customer transaction records.
- Enhanced dataset quality and derived insights on product popularity, payment trends, and age-wise buying behavior through exploratory analysis.
- Created interactive and statistical visualizations to identify monthly sales trends, heatmaps and top-selling category charts to highlight key business patterns.

Certificates / Certifications

Microsoft Power BI **June 2025**

Infosys Springboard – Certificate link

Cloud Computing **March 2025**

NPTEL —Certificate Link

Skills

Languages C++, Java, Python,Sql

Technologies/Libraries: Pandas, Matplotlib, Seaborn, SciPy, Scikit-learn, Git, GitHub, VS Code, JupyterNotebook

Domain Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design,EDA

Education

Lovely Professional University **2023-Present**

Bachelor of Technology - Computer Science and Engineering — CGPA: 7.0 *Phagwara, Punjab*

Aditya Jr Collage **2022-2023**

12th — Percentage: 85.5 *Mandapeta, Andhra Pradesh*

Bhashyam public school **2020 – 2021**

10th — Percentage: 92 *Ramachandrapuram, Andhra Pradesh*
